Product Executive

I bring emerging technologies to market and build the organizations to scale them. As a Marine Aviator turned Product Executive, I've spent 26 years defining missions, building plans, and delivering results when plans inevitably change. I've done it at GE, venture-backed startups, and a PE-owned company.

Career Highlights

- Launched more than a dozen products that collectively have generated over \$200M in revenue.
- Led product strategy and portfolio management for business generating more than \$300M in revenue.
- Delivered double-digit growth while leading the evolution into an AI-powered geospatial data platform.
- Led multiple business model transformations from perpetual licensing to recurring subscriptions.
- Defined and executed an open-source platform strategy to accelerate enterprise developer adoption.
- Built product organizations from the ground up, from initial hire to scaling more than 30 professionals.
- Served two overseas deployments as long-range, heavy-lift helicopter pilot in the U.S. Marine Corps.

Core Strengths

Product & Portfolio Strategy | Emerging Technology, Data & AI | Business Transformation
Organizational Leadership | Subscription & ARR Growth | Strategic Partnerships

Experience

Eagleview
